

A detailed view of the instrument panel of a Cessna 210 aircraft. The panel features several analog gauges including a tachometer, manifold pressure gauge, altimeter, and heading indicator. A central digital display is visible. The panel is mounted on a wooden dashboard. A semi-transparent blue overlay covers the lower portion of the image, containing text.

| Landing Fees | |
| Fuel | |
| Taxes | |
| En-route Fees | |

Terms & Conditions

Please note that all prices are indicative only and subject to change.
Quotations are subject to aircraft and crew availability when the booking

LUGGAGE SPECIFICATIONS

For small plane transfers, there is a strict weight and size restriction for luggage for the following reasons:

1. The aircraft is built for a maximum body and baggage weight.
2. The space for the storage of luggage is limited.

Please be advised that the default luggage restriction is 15 kg SOFT luggage per person on the light aircraft flights, including hand luggage. This might increase or decrease based on the itinerary (landing strips length and altitude) and number of clients in aircraft. It all depends on “weight and balance” and is adhered to in order to ensure maximum safety for our passengers. The size of each piece of luggage should **NOT** exceed the following dimensions:

Max. luggage size per person (incl. hand luggage): 300mm x 700mm x 360mm

Only soft luggage is allowed (hard-shell cases cannot be transported). Please note that the luggage compartment in the small aircraft is only 25cm high and pilots often have to adjust their pockets slightly to stow them.

GENERAL INFORMATION

The airline is not liable for delays or increased costs incurred due to unforeseeable circumstances:

1. Weather-related flight deviations and / or delays
2. Plan deviations for safety reasons, mechanical disturbances or similar

In the event of technical difficulties, NatureWings reserves the right to exchange the aircraft for another type of aircraft of similar size and engine power.

Please inform us in advance if one or more passengers are pregnant at the time of travel

GENERAL FLIGHT DETAILS

The flight duration is usually not more than 60 minutes. Longer flights can take up to 2h30. Departures are scheduled one day in advance for shared flight transfers by charter airlines, which means we cannot predict the final flight times. The camp managers inform the guests in the evening before camp change / departure. In general, transfers are in the mornings after check-out at the lodge, so you do not miss any activities.

It is possible that the flights stop up to three times on the way to pick up or deliver other passengers.

In private safaris, the times are flexible in principle. (Weather-related changes may occur - especially in the rainy season and the flyers are only allowed to fly in brightness)

The latest departure time is at the discretion of the pilot. The pilot will always and timely inform you about possible delays and the estimated travel and arrival time.

Travel beginning: We, NatureWings, start our flight safaris either directly after arrival of the passengers at Hosea Kutako International Airport. Alternatively, (if passengers spend a night in Windhoek, for example), the flight safari starts at Windhoek Eros Airport. In this case, customers will be picked up by a NatureWings employee at their accommodation in Windhoek and taken to Eros Airport in time for departure.

CANCELLATION POLICY

In order to confirm a booking - 20% non-refundable deposit is required

More than 8 weeks' notice - non-refundable deposit of 20% forfeited

Less than 8 weeks' notice - deposit plus 25%

Less than 4 weeks' notice - 50%

Less than 3 weeks' notice - 60%

Less than 2 weeks' notice - 100%
